

MUNICH MEDICAL RESEARCH SCHOOL

GOOD SCIENTIFIC PRACTICE

- AN INTRODUCTORY WORKSHOP -

When: November 30th, 2016 at 5:00 pm

Where: kleiner Hörsaal (F1.08, Pettenkoferstr. 14)

SPEAKER

Dr. Alexandra Stein
GraduateCenter^{LMU}

“Science and the humanities are founded on integrity. It is one of the key principles of good scientific practice and therefore of every piece of research. Only science performed with integrity can ultimately be productive science and lead to new knowledge. On the other hand, a lack of integrity can represent a threat to science, destroying the confidence of researchers in each other and that of the public in science; research is unthinkable without this confidence.” (Safeguarding Good Scientific Practice. Memorandum. German Research Foundation, 2013)

During the course of this lecture, doctoral candidates will receive an overview of the recommendations given by the German Research Foundation (Deutsche Forschungsgemeinschaft, DFG) in their memorandum titled “Safeguarding Good Scientific Practice”, which covers issues such as:

- Rules and regulations
- Ombudsmen
- Supervision
- Quality vs. quantity
- Data handling
- Publishing
- Funding
- Confidentiality
